# NEITH i.MX93 OSM Small Module

The MAS OSM i.MX93 is based on the new OSM 1.1 standard (Size-S) "Small" for completely machine processible low-cost embedded computer modules during soldering, assembly and testing.

MAS OSM i.MX93 provides fast and low power LPDDR4 memory technology with inline ECC support, combined with up to 256GB eMMC Flash memory. Hardware Watch dog, Chip ID and TPM Module are integrated in the board. Various interfaces for embedded applications such as Dual Gigabit Ethernet(RGMII), USB 2.0, 2x CAN-FD, MIPI-DSI and MIPI CSI-2 (2-lane) for connecting a camera are available. The typical design power ranges from 2 W to 4 W. Logevity is 15 years.

MAS OSM i.MX93 provides fast and low power LPDDR4 memory technology with inline ECC support, combined with up to 256GB eMMC Flash memory. Hardware Watch dog, Chip ID and TPM Module are integrated in the board. The module is compliant with the new OSM 1.1 standard. For evaluation and design-in of the new MAS OSM i.MX93 module, MAS provides a development platform and a starter kit. A Yocto based Linux Board Support Package is available.
